

RoHS DECLARATION – FEB 2021

Direct Components is aware of various RoHS compliance mandates and therefore gathers information concerning the components that it resells to assist its customers in determining whether such components comply with the mandates.

Direct Components is an independent distributor and therefore does not manufacture any of the components that it offers for sale. The Original Component Manufacturer (OCM) is the only source that can provide final information as to whether a specific component is RoHS compliant.

Direct does not introduce any chemicals or materials in its processes that change the RoHS status of the components that it sells. This includes the 10 substances from both the RoHS 2011/65/EU and (EU) 2015/863 directive.

Any information provided by Direct concerning the RoHS status of a component has been provided based upon our best effort to provide accurate information obtained from the manufacturer's web site, data sheet, or other information provided by the manufacturer.

Direct cannot be held responsible for information that it or its employees provide concerning the RoHS status of a component, or for errors or omissions, even if due to employee error or negligence.

Ultimately, you the customer, are responsible for verifying RoHS compliance of product purchased from Direct or any distributor, as no distributor can certify RoHS compliance beyond reviewing supporting documentation from the component's manufacturer.

Direct Components, Inc.
